

# MODULAR ENCLOSURES

## Flexible Storage. Uncompromising Protection.

Silver Linings Systems' Modular Enclosures are designed to fit your business, with right-sized protection for the hardware you have and scalable solutions for the systems you're building.

**Defend against overheating**

Extend the life of expensive hardware with cooling systems designed for your needs.

**Keep operating costs low**

Minimize costs with efficient cooling that reduces waste and energy usage.

**Lock out dirt and dust**

Cleanliness you can trust, even when operating alongside industrial equipment.

**Install simply and easily**

Streamline installation with enclosures that integrate with your existing equipment.

# Guard against lost data or downtime with protection that fits your changing needs.

## Offices

Save on construction costs with free-standing units

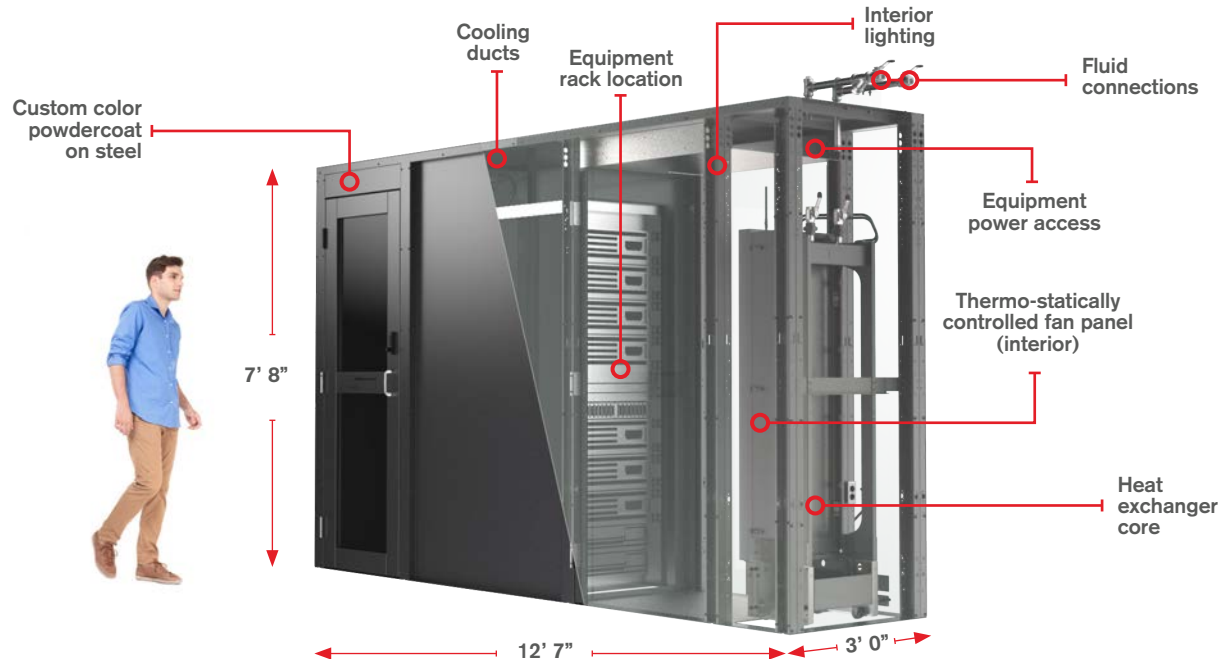

## Industrial Use

Keep your equipment clean, even in harsh environments

## Data Centers

Minimize upfront cost and expand only when you need it

## Component Overview

### Basic Configuration:

- Steel Construction
- Easily Relocatable
- 1 or 2 Rack Enclosure
- Zone Climate Control
- Keypad Lock
- Up to 60U equipment capacity

### Additional Options:

- Chilled Water Supply Station
- Alternate Rack Stall Configurations
- Smoke Detection
- Fire Suppression
- Emergency Power Cutoff
- Programmable Controller
- Remote Monitoring
- Remote Access Control
- Equipment Racks

Nominal IT Power Load	6.0 kW/Rack
Nominal Cooling	1.7 Tons
Cold Aisle Design	$\leq 27^{\circ}\text{C}$ (80°F)
Gross Installed Weight (without rack/IT equipment)	606 kg (1,334 lbs.)
Sound Performance	$\leq 60$ dBa at 1 m

Your Modular Enclosure may need a Fluid Cooler and Chiller to maximize cooling power.
